Note: Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered/reregistered under the Federal Insecticide, Fungicide and Rodenticide Act. Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

Based on your response to the Reregistration Eligibility Document(s) for **Carboxin**, EPA has reregistered the product listed above provided that the following changes are made to the label:

1. On page 2, change "Do not contaminate water, food, or feed by storage, disposal, or cleaning of equipment." to "Do not contaminate water, food, or feed by storage and disposal."

2. On page 2, under the Environmental Hazard heading, delete current statement and add "Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

This product contains metalaxyl that is known to leach through soil into groundwater under certain condition as result of agricultural use. Use of this product in areas where soils are permeable, particularly where the water table is shallow, may result in groundwater contamination.

- Treated seed exposed on soil surface may be hazardous to birds. Cover or collect spilled seeds."
3. On page 2, in the Labeling of Treated Seed section, add "This product contains metalaxyl that is known to leach through soil into groundwater under certain condition as result of agricultural use. Use of this product in areas where soils are permeable, particularly where the water table is shallow, may result in groundwater contamination."
4. Because the REI for Metalaxyl is 24 hours, on page 2, change "do not enter or allow worker entry into treated areas during the restricted-entry interval (REI) of 12 hours" to "do not enter or allow worker entry into the treated areas during the restricted-entry interval (REI) of 24 hours."
5. On page 4, after the Conditions heading, revise "All such risks shall be assumed by the user or buyer." by adding "To the extent consistent with applicable law, all such risks..."

This action is taken under the authority of section 4(g)(2)(c) of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended. Reregistration under this section does not eliminate the need for continual reassessment of pesticides. EPA may require submission of data at any time to maintain the registration of your product.

Submit one (1) copy of final printed labeling incorporating the above changes before you release the product for shipment. Amended labeling will supersede all previously accepted labels. A copy of your label stamped "Accepted with Comments" is enclosed for your records. If you have questions concerning this letter, you may contact me at 703-308-9354.

ENGINEERING CONTROLS

When handlers use closed systems designed by the manufacturer to enclose the pesticide to prevent it from contacting handlers or other people and the system is functioning properly and is used and maintained in accordance with the manufacturer's written operating instructions, the handlers need not wear the chemical-resistant apron. However, the chemical-resistant gloves must be immediately available for use in an emergency, such as a spill or equipment breakdown.

ENVIRONMENTAL HAZARDS

MEMORANDUM:

Subject: Carboxin RED
Prosper® T200
EPA Reg. No.: 264-1035
Re: PRB Preliminary Label Assessment

From: Judy Loranger *Judy Loranger 12/12/07*
Product Reregistration Branch
Special Review and Reregistration Division (7508P)

Through: Lawrence Schnaubelt *Lawrence Schnaubelt 12/12/07*
Product Reregistration Branch
Special Review and Reregistration Division (7508P)

To: Venus Eagle, Product Manager, Risk Management Team 1
Insecticide-Rodenticide Branch
Registration Division (7505P)

SCOPE: The primary purpose of this preliminary label assessment is to determine whether or not the draft labels submitted in connection with product reregistration comply with amended labeling language specified in Chapter V of the subject RED/IREDD. Product-specific data (product chemistry, acute toxicity, and in some cases efficacy data) were also required to be submitted or cited to support product reregistration. PRB's reviews of these data are appended to this assessment and may require additional revisions to the product label.

BACKGROUND: The registrant has submitted 5 copies of draft labeling for the subject product in its 8-month response to the RED/IREDD. PRB has completed a preliminary assessment of the draft labeling. A copy of this assessment may be accessed electronically on the LAN through the Q-Drive. The path is q:\prb\label\000264\1035.

Note: In addition to the information presented in this preliminary label assessment, Product Manager/Label Reviewers must apply their own knowledge of the subject product and the product's regulatory history (including comparison with existing stamped accepted labeling) to conduct a final review of the proposed label. It is the responsibility of the PM to obtain the necessary label improvements required for final product reregistration.

This product contains multiple active ingredients. PRB has not conducted an in-depth assessment of the label to determine if label requirements for the Metalaxyl RED have been addressed by the registrant. Where differences in PPE and WPS requirements exist, PRB has attempted to adopt the more restrictive language.

PRB recommends that the PMs continue to follow the guidance provided in the Label Review Manual, including formatting suggestions presented in the sample labels in Chapter 3, to improve the quality and consistency of product labels.

RECOMMENDATIONS:

The label contains text as required in the Carboxin RED. However, the subject product requires revisions to conform with the Metalaxyl RED. Deficiencies are listed in the table below. Subject to final review by the Product Manager, PRB recommends that the registrant resubmit to the Product Manager revised product labeling that addresses the deficiencies specified in this review and any other deficiencies specified by the Product Manager.

BACKGROUND: In the 8 month response to the Carboxin RED, the registrant is citing acute toxicity studies to support the reregistration of their product, EPA Reg. No. 264-1035. The MRID's are as follows: 468539-02 (81-1), 468539-03 (81-2), 468539-04 (81-3), 468539-05 (81-4), 468539-06 (81-5), 468539-07 (81-6). INTRODUCTION:

A Reregistration Eligibility Decision (RED), Case number 0012, was issued in September, 2004 for the Technical Grade Active Ingredient (TGAI) Carboxin (5,6-dihydro-2-methyl-N-phenyl-1,4-oxathin-3-carboxamide). According to the RED, the generic data base supporting the reregistration of Carboxin have been reviewed and found to be substantially complete.

In the 8-month response to the Carboxin RED, Bayer CropScience submitted Confidential Statements of Formula (CSF), one basic and one alternate formulation, both dated 8/20/07; a product label (no pin-punch date); and product chemistry data in MRID numbers 468506-01, -02, and -03. The registrant is requesting FIFRA Section 4 reregistration of EPA Reg. No. 264-1035.

FINDINGS:

1. EPA Reg. No. 264-1035 is an end-use product that contains the active ingredients Carboxin, Clothianidin, Trifloxystrobin, and Metalaxyl at label claim nominal concentrations of 3.87%, 11.05%, 0.552%, and 0.414%, respectively.
2. The CSFs for the basic and alternate formulations, dated 8/20/07, are acceptable as presented. The nominal concentrations of the active ingredients agree with that on the label, meeting PR Notice 91-2 (Accuracy of Stated Percentages for Ingredients Statement). The certified limits on the active and the inert ingredients are acceptable in accordance with 40 CFR 158.175(b)(2). All ingredients listed on the CSFs are cleared for use in pesticide formulations and have tolerance exemptions for all food uses.
3. The product chemistry data in the MRIDs listed above were previously submitted to the Registration Division (RD) in connection with the registration of the subject product. These MRIDs were reviewed and accepted by S. Mathur of the TRB/RD on 11/21/06 under DP Barcode number D330683. MRID number 468506-01 pertain to data on Product Identity and Composition, Beginning Materials, Formulation Process, Discussion of Impurities, Color, Physical State, Odor, Oxidation/Reduction Action, Flammability, pH, Viscosity, and Density. Enforcement Analytical Method is found in MRID number 468506-02, and Storage Stability and Corrosion Characteristics are found in MRID number 468506-03. PRB/SRRD concurs that the data are acceptable and satisfy the 40 CFR guideline requirements for 158.155 to 158.190, and may be used to support the reregistration of the subject product.
